

GLASS BALUSTRADE INSTALLATION CHECKLIST

Ver. 1.1

PLANNING AND SET-OUT

- Is that your deck, stairs or concrete damage and rot-free?
- Design your balustrade with our friendly sales staff
- Check the design meets your local regulations
- Will your deck need noggins?
- Do a pre-order trial layout
- Will you require factory applied EnduroShield?
- Place your order!
- Get your delivery date
- Have a buddy ready to assist in unloading and handling of the glass panels
- Clear delivery access and a good sized working area
- Prepare your tools, glass separators and protection and safety gear

INSTALL DAY

- Mark your glass run centre lines
- Fit or have fitted any necessary deck noggins
- Mark where your panels, gaps and spigots or pin fixings will fall
- Install the panels as per your set out
- Adjust for alignment & shim if necessary
- Install handrail pins into holes
- Measure the hand rail material into runs
- Cut & fit handrail & joiners
- Make any final adjustments & fully tighten

MAINTENANCE

- Plan your regular cleaning of the glass
- Plan your hardware maintenance

CERTIFICATION

- Along with our quality assurance document, contact your local council for certification requirement.
